DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Objections

2. Claim 36 is objected to because of the following informalities: no independent claim is referenced. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 3-8, 10-38, and 41 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are vague and indefinite as it is not clear how the apparatus achieves the desired results as claimed. It is unclear how the liquid core would proceed from interior to exterior states through the cladding, since the fibers would become inoperative after this liquid is excreted. It is unclear how the temperature or projection formed (for tactile sense) on the outside of the optical fiber operates. It is unclear how the display receives and displays the sensory information other than visual/audio.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2874

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3, 5, 9, 11, 13, 14, and 39-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Tremblay et al. U.S.P. No. 6,088,017.

Tremblay et al. U.S.P. No. 6,088,017 teaches (Figs., column 1 lines 37-63; Summary) an information receiving/displaying device (such as virtual reality with multi-sensorial interactions) that displays senses other than audio and visual. For instance, force and tactile, smell, and even taste can be displayed. Regarding claims 39-40, the method is inherent from the apparatus. The art of Tremblay et al. '017 clearly, fully teaches Applicant's claimed limitations.

Inventorship

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure, with respect to sensory information besides visual/audio:
